CYBER HEALTH CHECK-UP

SERVICE	RISK			Score		Mitigation Factor		Mitigation Score
	HIGH (1)	MEDIUM (2)	LOW (3)	(1-3)				
ENDPOINT	Not all devices using endpoint	All devices have AV but using legacy, signature based protection	All devices have a next-gen endpoint protection that can detect file-less attacks		x	4	=	
EMAIL PROTECTION	Using standard spam filter	Some use of advanced spam filter	Using advanced email protection		x	4	=	
2FA/SSO	No 2FA Policy	Some apps using 2FA and SSO	Most apps using 2FA and SSO		x	4	=	
FIREWALL/IDS	Not Using firewalls at every site	Advanced firewalls but no IDS system	Advanced firewall and IDS		x	4	=	
SECURITY MONITORING	Not being monitored by SOC	Network monitoring OR log monitoring from a SOC, but not both	Full network and log monitoring by SOC		x	4	=	
BACKUP	No image based backups	Semi-regular image based backups of critical data	Regular image based backups of all critical data		x	3	=	
PATCH MANAGEMENT	Not doing patch management	Only doing patch management for some servers	Fully enrolled in patch management		x	3	=	
TRAINING	No cybersecurity training for employees	Semi-annual cybersecurity training for all employees	Annual cybersecurity training for all employees		x	3	=	
PASSWORD POLICY	No password Policies	Some apps using robust password policy	All apps using robust password policy		x	2	=	
THREAT INTEL	Not receiving threat intelligence	Sourcing your own threat intelligence	Receiving vetted threat intelligence from cybersecurity experts		x	2	=	

RECOMMENDATIONS FOR IMPROVEMENT:

SCORE KEY

BELOW 70 : Danger Zone
70 - 90 : At-risk
OVER 90 : Safe Zone
